

Free Head and Neck Cancer Screening

Screening is fast and pain free. Get your free personalized risk assessment.

Many head and neck cancers are preventable and can be linked to tobacco use or sun exposure. If found early, head and neck cancers are highly curable.

At the screening on April 5th, you have the opportunity to get a personalized risk assessment for:

- Skin cancer (face and scalp), including melanoma
- Oral cancer (mouth and throat)
- Thyroid cancer
- Neck cancer

In addition, you can find information to help you stop smoking, prevent sun damage and learn about HPV vaccine recommendations.

**Friday,
April 5, 2019**
10 a.m. - 2 p.m.

OHSU Center for Health & Healing, Lobby
3303 S.W. Bond Ave.
Portland, OR 97239
