

Chemical Biology and Physiology Summer Undergraduate Research Program (CBP-SURP)

School of Medicine

Participating faculty

Carsten Schultz
Thomas Scanlan
Francis Valiyaveetil
Xiangshu Xiao
Michael Cohen
Kimberly Beatty
Catherine Morgans
Beth Habecker
Martin Kelly
Oline Ronnekleiv
Sue Aicher

We are excited to announce the 3rd annual Chemical Biology and Physiology Summer Undergraduate Research Program (CBP-SURP). CBP-SURP is a 9-week program designed to provide undergraduates research opportunities at the interface of chemistry, biology and physiology in the health sciences. A major goal of this program is to engage students in state-of-the-art techniques in chemical biology, and how strategies in chemical biology can be used to interrogate cell signaling, protein function, and identify potential therapeutic targets.

In addition to daily research activities, students will also participate in:

1. Journal talks
2. An oral presentation followed by a reception
3. Seminars on scientific and professional development
4. Social and culture events

Requirements:

1. Be currently enrolled in college
2. Major in chemistry, biochemistry or related fields
3. Have completed at least four semesters or six quarters of undergraduate study.
4. Have a desire to pursue a PhD in chemical biology and physiology or related field
5. Participate in the entirety of the program

The 2019 program will run from 08 July to 04 September. Students will receive a generous stipend that will cover travel and housing expenses. To apply, please submit the following:

1. Curriculum vitae
2. Personal statement: a brief description (1 page) of your most meaningful research experience and future career goals.
3. A list of three participating faculty members with a short paragraph describing your interests in their lab
4. Copy of college transcript
4. 2 reference letters from faculty members (sent separately)

Complete applications (pdf format) should be sent to ph2search@ohsu.edu by 5 pm on 05 March 2019.
